

**We get things moving**

## Company

As a leading provider of logistic services, we have moved, among other things, more than 40 million vehicles with our 2.000 employees. An unprecedented success story based on quality, efficiency, innovation and punctuality.

Our company's philosophy is as simple as this:

***We want to be the best partner in all aspects relating to the automobile.***

Since the foundation of the company "Horst Mosolf Spedition und Transporte" in 1955, our company has developed from a forwarding agency into a provider of technical and logistic services for the international automobile industry, for manufacturers of agricultural and construction machinery, car rental and leasing companies, and fleet customers.

It is our aim to cover the **complete process** from the take over up to the distribution of vehicle data flow included.

## Range of services

The MOSOLF Group offers the complete range of services and creates individual solutions of mobility.

With our extensive network of technical and logistic centers, and our fleet of trucks, we can guarantee service to the complete satisfaction of our customers.

Trust and fairness are two of our main principles our customers can expect from us.

## Range of services

### :: Logistic:

By means of the sophisticated equipment of our trucks, the MOSOLF Group operates with 800 special carriers within Europe. We also have a ship for inland water transport, our own fleet of double-decker waggons, and our own railway company at our disposal.

### :: Technical Services:

The MOSOLF Group has consistently taken advantage of the opportunities afforded by technological developments and increasing individualisation in the automobile sector. We now offer a wide range of services including the construction of special cars, fitting of additional equipment, paint, mechanical and body work. We also carry out evaluation, inspection and maintenance of vehicles at our premises.

### :: Fleet Business:

Within the MOSOLF Group all services in the sectors Technology & Logistics for rental cars, fleet and leasing vehicles aim at a customer oriented solution. Quality, punctuality, reliability, flexibility, know-how and innovation are of particular importance.

### :: High & Heavy:

With our fleet of more than 70 special carriers, such as deeped carriers, plateau carriers and truck carriers, we transport agricultural and construction machines within Europe and Eastern Europe. Our trucks are equipped with the most modern communication systems as satellite route finders. We own permanent licences for the transportation of vehicles exceeding the usual measurements to most European countries. Our technical and logistic centers also offer additional special technical services.

## Figures & Facts

### :: Turnover 2007

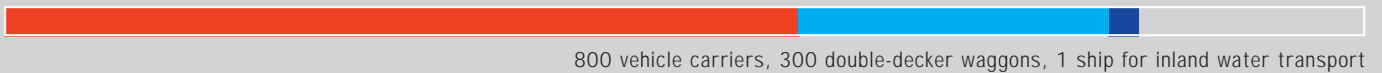

### :: Staff 2007

### :: Technical and logistic centers

### :: Fleet

### :: Volume logistics p.a.

### :: Volume technical services p.a.
